Experience

Aug '23 - Present — **Warp,** *Software Engineer*, Rust, Go — *New York City*
- Building features for the core product at Warp, such as better shell prompt support
- Developing AI functionality within Warp, including Agent Mode

Oct '22 – Jan '23 — **Ramp,** *Software Engineering Intern*, Python, Elixir — *New York City*
- Designed & implemented a new system for handling exceptions for customer applications.

Jul – Oct, 2022 — **Warp,** *Software Engineering Intern,* Rust — *New York City*
- Launched syntax highlighting & error underlining to all users–two highly requested features

Apr – Jul, 2022 — **Octant Bio,** *Software Engineering Intern,* Python, TypeScript (React) — *Berkeley*
- Created a tool to help scientists work with lab automation in high-throughput chemistry

Sep – Dec, 2021 — **Instabase,** *Software Engineering Intern*, Go, Kubernetes — *New York City*
- Developed an on-prem testing framework for automated testing on customer deployments

May – Aug, 2021 — **Riot Games,** *Software Engineering Intern,* Java, TypeScript (React) — *Los Angeles (remote)*
- Created a tool to help manage player moderation for millions of players across Riot's games

May – Sept, 2020 — **Google,** *Software Engineering Intern,* C++, Python — *Boston (remote)*
- Automated detection of government webpages and inconsistencies in the Knowledge Graph

Jan - Apr, 2020 — **Social Capital,** *Software Engineering Fellow*, JavaScript (React Native) — *Palo Alto*
- Worked on Hapi, built Growth featuresincreasing daily signups by over 70% over 4 months

May - Aug, 2019 — **Google**, *Software Engineering Intern*, Go, Python — *New York City*
- Created data ingestion pipeline for the Knowledge Graph and served data to Google Search

Jan - May, 2019 — **Canadian Special Forces (CANSOFCOM),** *Virtual Force Intern (DND)* — *Ottawa (remote)*

Jul - Aug, 2018 — **North,** *Software Prototyping Intern*, JavaScript (React) — *Kitchener*
- Developed prototypes for Focals, a pair of smart glasses and automated GitHub flows

Jul - Aug, 2017 & Aug 2016 — **Christie Digital,** *Software Engineering Intern*, C++, JavaScript, Python — *Kitchener*
- Built system tests dashboard & improved machine vision projection-mapping algorithms

Projects

Aug, 2017 / ***2nd Place Award*** — **Timelime**, *Bonfire (hackathon)*, JavaScript
- Created a Chrome extension for Facebook messenger to automatically analyze a group chat and quickly identify availability of people from messages, using natural-language processing

Mar, 2017 / ***1st Place Award*** — **Pebble Prompter**, *WearHacks*, C, JavaScript
- Developed an automated teleprompter for the Pebble smartwatch using Firebase

Awards

2018 — **Schulich Leader Scholarship**, *University of Waterloo*

2014 - 2018 — **Gold Medals**, *Waterloo Wellington Science and Engineering Fair (WWSEF)*

Extra Curriculars

2019 - 2023 — **Logistics Organizer & Backend Lead at Hack the North,** *University of Waterloo*
- Canada's biggest hackathon with over 3000 competitors – built a GraphQL API to handle hacker data with over 2 million requests; leading a group of 5 backend developers.

2017 - 2018 — **Founder of JAMHacks,** *Sir John A. Macdonald S.S.*
- Over $10,000 in sponsorships and 200 competitors

Education

2023 - Present — **Georgia Institute of Technology,** *Master's Computer Science (MCS), GPA: 4.0*

2018 - 2023 — **University of Waterloo,** *Honours Computer Science (BCS), GPA: 92.72%*

2021 - Present — **Neo Scholar**

Jul, 2016 — **SHAD Fellow**, *Carleton University, Ottawa, ON*
